

# Taylor Growden

Full Stack Web Developer

---

I'm a problem-solver: a full-stack web app developer who enjoys excels at making elegant solutions to all sorts of problems. When I'm not writing code, I enjoy live music, craft beer, hunting for the perfect cup of coffee, and reading a good book.

---

## Experience

Nov 2017 -  
Present

**Web App Developer, [Exclamation Labs](#)**

As an agency that focuses in the financial and insurance sectors, I specialize in taking the clients' specific, complex needs and implementing simple-to-use solutions.

Mar 2016 -  
Nov 2017

**Software Developer, [Willetts Systems](#)**

I worked on custom web-based apps for a variety of clients in various sectors—especially in healthcare. I primarily worked on a fully certified, HIPAA compliant electronic medical record, including designing, maintaining, and documenting a custom REST API for the EMR.

Mar 2015 -  
Mar 2016

**Freelance / Consulting**

During my time working as a consulting web developer, I designed and developed sites and web apps for businesses and individuals, ranging from single static pages to full featured apps solving unique problems.

## Technical Experience

**Open Source**

I love open source. You can check out a list of some [featured projects](#) or view my [GitHub](#).

**Expertise**

**JavaScript** is my language of choice; it is powerful and performant, and the ecosystem is fast-paced and exciting. I especially enjoy using **React** and **Next.js** on the frontend. For backend logic, I have plenty of experience with **node** and **Express**. For cross-platform mobile development, my go-to is **React Native**.

I have basic to intermediate knowledge of **Java**, **PHP**, **Docker**, and **Bash/Shell Scripting**.
